Internal Risk Factors

1. ***Our Company, Promoters, Directors and Group Companies are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

Our Company, Group Companies, Promoters and Directors are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals and forums. Mentioned below are the details of the proceedings involving our Company, Promoters, Directors and Group Companies as on the date of this Draft Prospectus along with the amount involved, to the extent quantifiable, based on the materiality policy for litigations, as approved by the Company in its Board meeting held on May 24, 2019.

There can be no assurance that these litigations will be decided in favour the Company, Promoters, Directors and Group Companies, respectively, and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases filed by and against our Company, Promoters, Directors and Group Companies please refer the chapter titled “Outstanding Litigations and Material Developments” on page no. 167 of this Draft Prospectus.

2. *We are heavily dependent on certain suppliers for whom we are either authorised distributors or have entered into MoUs with, for procurement and sale of our traded goods. Any disruption of supply from such entities may affect our business operations.*

We mainly procure our traded goods from key players in Indian Steel Industry including Jindal Steel Private Limited (JSPL), Steel Authority Of India Limited (SAIL), Rashtriya Ispat Nigam Limited, Monet Ispat & Energy Limited (MIEL), to name a few. We believe that the quality of steel products supplied, the transparent pricing, locational advantage, etc. are some of the major reasons our Company prefers to procure our traded goods from these key players. However, the fact that we are so heavily dependent on these manufacturers exposes us indirectly to the risks that these manufacturers face. Any failure of the manufacturers to deliver these traded goods in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our business operations and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers and incur liabilities for failure to execute orders, which could have a material adverse effect on our business financial condition and results of operations.

3. *Our business is working capital intensive. If we are unable to generate sufficient cash flows to allow us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.*

Our business is working capital intensive including fund requirement for payment for bulk purchases of various products across different brands and product verticals. Hence, major portion of our working capital is utilised towards debtors and inventory. Our debtors for the F. Y. 2018-19, 2017-18 and 2016-17 was approximately 142%, 140% and 113% of the total net worth respectively in each year. Our inventories for the F. Y. 2018-19, 2017-18 and 2016-17 was approximately 95%, 91% and 79% of the total net worth respectively in each year.

The results of operations of our business are dependent on our ability to effectively manage our inventory (stock of traded goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

We have a sanctioned limit for working capital of ₹ 6,800 lakhs from the existing bankers / financial institutions. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors and we may be forced to go for Corporate Debt Restructuring (CDR) which may result in adversely affecting our operations and future prospects.

4. We are involved in high volume – low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results and financial conditions. Due to the nature and varied types of the products we sell, we may not be able to charge higher margins for our products. Hence, our business model is heavily reliant on our ability to effectively increase sale of value business products and / or grow our turnover and manage our key processes including but not limited to order procurement, timely order execution, effectively delivery monitoring and continuous cost control of non-core activities. The table below gives details of our operating margins and net profit margin based on restated financials.

(₹ in lakhs)

Particulars	Year ended March 31, 2019	Year ended March 31, 2018	Year ended March 31, 2017
Total Income	37,729.03	27,788.74	24,900.39
PAT as a % of Total Income	1.52%	1.96%	1.18%

We operate in a dynamic industry, and on account of changes in market conditions, industry dynamics or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations of our results, please refer “Management’s Discussions and Analysis of Financial Condition and Results of Operations” on page no. 153 of this Draft Red Herring Prospectus.

5. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favourable terms, or at all.

As of March 31, 2019 and March 31, 2018, we have ₹ 6,686.74 lakhs and ₹ 6,313.93 lakhs respectively, of outstanding debt including current maturities of Long Term Debts on our balance sheet. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected. We intend to repay part of our indebtedness in the form of unsecured loans from our Promoters / Directors, from the funds proposed to be raised from this Issue. The reduction in the debt will enable us to improve our debt equity ratio and the total indebtedness after the proposed re-payment will be ₹ 6,176.49 lakhs.

Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings.

Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition.

Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

6. *Our success depends heavily upon our Promoters and Directors for their continuing services, strategic guidance and financial support.*

Our success depends heavily upon the continuing services of Mr. Jatin Mehta, Mr. Ajay Bansal and Mr. Sanjay Bansal who are the natural person in control of our Company. Our Promoters have a vast experience in the field of trading in Steel products through their erstwhile partnership firms engaged in similar business. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe that our relation with our Promoters, who have rich experience in trading in steel industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters are also part of certain other firms / ventures and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Directors for executing their day to day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

In addition, we depend on our Directors / Promoters in procuring certain bank loans and for the extension of unsecured loans and advances from time to time. We rely on our Directors and Promoters, in relation to our bank loans for which they have granted certain security and personal guarantees. For details, see "Annexure XXV – Related Party Transactions" and chapter titled "Financial Indebtedness" on page nos. 130 and 164 respectively of this Draft Prospectus. We cannot assure you that any future financing we obtain without guarantees from our Directors / Promoters or from unrelated third-parties will be on terms which are equal to or more favourable than the terms of our past financings.

7. *Our Company has not entered into any long-term contracts with most of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability*

Our Company has had long standing business relationships with various customers and have been supplying our products to several customers including repeat orders received from them. A substantial number of our customers are big brands engaged in varied industry segments like engineering, infrastructure, construction, automobiles, etc. However, we have not entered into any fixed contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management.

Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers,

etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

8. *Our Company has entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into related party transactions with our Promoters, Directors, and their relatives aggregating ₹ 5,193.62 lakhs for the financial year ended March 31, 2019. While our Company believes that all such transactions have been conducted on the arms length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “Annexure XXV - Related Party Transactions” under section titled “Financial Statements” on page no. 130 of this Draft Prospectus.

9. *Our Company has availed unsecured loan from our Directors / Promoters and Promoter Group which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.*

Our Company, as per the restated audited financial statement as on March 31, 2019 has availed unsecured loan of ₹ 2,398.25 lakhs at the interest rate of 15% pa and are repayable on demand. Though our Company intends to repay an amount of ₹ 1510.25 lakhs from this proposed Issue, sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no. 130 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

10. *The IPO Proceeds will be used to repay a loan from our Directors / Promoters*

We intend to use the proceeds from the Issue to repay a loan from our Promoters / Directors. As of March 31, 2019, we have availed an aggregate of ₹ 2,398.25 lakhs of unsecured loans from them and these loans were to utilized to fund working capital expenditures and for general business purpose. We intend to repay an aggregate of ₹ 1,510.25 lakhs of the said outstanding loan. We believe that the proposed repayment will enable us to improve our debt-equity ratio and the total unsecured loans after the proposed repayment will be ₹ 888 lakhs:

For details, refer the chapter “Objects of the Issue” on page no. 59 of this Draft Prospectus.

11. *We are dependent on third party transportation providers for the delivery of majority of our products from our suppliers and also to our customers. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects*

As a Company engaged in the trading of Iron & Steel products, transportation is one of the most important components of our business. We rely substantially on third party transportation providers for the supply of many of our traded goods from our vendors and for delivery of our products to our customers. Transportation strikes / non-availability of Transportation could have an adverse effect on our receipt of traded goods and our ability to deliver the same to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the freight cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India’s physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including supply from our vendors and delivery of our products to customers by third-party transportation providers. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

- 12. *We do not have any agreement with the third party service providers to whom we outsource Steel Coil cutting and deliveries; any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.***

Our Company relies on third parties for outsourcing cutting, finishing and storage of one of our traded products i.e. Steel Coils. We procure the Steel Coils and the same are delivered directly to these third parties who cut the coils as per customer requirement and then deliver the same to such customers. This entire process is done on invoice basis and we have no agreements with any of these third parties. Further, we cannot assure you that our third party service providers will continue to be associated with us on reasonable terms, or at all. Since such third party service providers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such third party service providers, which may cause them to cater to our competitors alongside, or even instead of us. Also, in the absence of any contract, they may discontinue their job-work on a short notice and our business may be stalled or hindered due to this. We may have to rely on in-experienced or costlier or unprofessional cutting units which may compromise the quality of our finished products.

Also, the cut Coils are generally stored at the premises of such third party. Though our business has not experienced any major delay due to disruption in the quality of third party services, but any future delay in this process may have an adverse impact on our business. The said third party facility may not be adequate to support our existing and future requirements and any breakdown in accuracy of the job work processes, delivery management system, delay of service including occurrence of accidents at such facility of the third party may affect our business operations.

Further any disruption in their services due to strikes, lock-outs, inadequacies at the facilities of such third party, or other unforeseen events could impair ability to deliver the steel coils to our customers on time. Any such disruptions could materially and adversely affect our Company's reputation, business and results of operations.

- 13. *Our Company has limited storage capacity which can result in stock out cost and loss of customer adversely affecting our business and results of operations.***

Large warehousing capacity is the key growth driver in steel trading business. Large warehousing ensures a regular supply of goods into the marketplace by being able to procure goods in bulk quantities and then releasing them to various customers in the varied quantities required by them. Maintaining consistent stock levels helps prices to stay stable, making it easier for businesses to forecast profit and loss. Large warehousing facility also helps in attracting a variety of customers by providing them with a wide range of products and meeting their order requirements in a timely manner.

Though our Company has a godown space measuring 9,500 square meters, where currently our entire stock is comfortably stored, we cannot guarantee that this space will be sufficient to store our future procurements. As per management estimates, our godown has a storage capacity upto 7,000 to 12,000 tonnes of steel products depending on nature of the products after taking care of factors like free human movement and crane movement for day to day operations. This may restrict our storing capacity and in turn restrict the variety of products which we can procure and store. Inability to meet customer demand due to inadequate storage may adversely affect our Company's reputation, business and results of operation.

- 14. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences in timely manner or comply with such rules and regulations or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled

“Key Regulations and Policies” and “Government and Other Key Approvals s” at pages 95 and 175 respectively of this Draft Prospectus.

15. *Internal logistics form an integral part of our godown management and our inability to maintain our godown with efficient staff, machines and planning may lead to delays, injuries and lack of space.*

Our Company procure steel products from steel manufacturers and supplies the same to various locations, PAN India, using the roadways as the preferred mode of transportation. Further these products which include Angles, Plates, Channels, TMT Bars, Beams, Sheets and Plates are extremely heavy and bulky in nature. Though our Company has equipped its godown with 2 cranes, we are required to hire additional cranes in case of need. We cannot guarantee that we will be able to obtain additional cranes, as and when required or at the terms acceptable to us, we may not be able to manage the loading / unloading process properly or in time or both.

Also, the operating of cranes and the process of loading and unloading required skilled / semi skilled labour who stack the bulky goods in an orderly manner, thus utilising the maximum space in the godown. Any lack in the labour for the required work, including operating of the crane may hinder our godown activities leading to delays in deliveries, unorganised stacking of steel products, lack of space in the godown and also personal injuries. If any of the above were to happen, we may be subject to order cancellations, litigations and loss of reputation, consequently leading to adverse operational and financial positions.

16. *If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.*

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new supplier MOUs / agreements, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and have an adverse effect on our business. For e.g. our strategy to increase operational efficiency is dependent on our ability to focus on better analysis of customer demand and accordingly managing our bulk supply of the various traded products. Further, our strategy to improve our debt – equity ratio may not materialise in the manner we intend to, and we may be required to obtain additional debt to meet immediate capital requirements, resulting in unfavourable ratios.

Further, if the estimates or assumptions used in developing our strategic plan vary significantly from actual conditions, our sales, margins and profitability could be impacted. For instance, sales of certain category of products may not grow as quickly as we currently expect, and we may be incorrect in our assumptions and expectations of customer preferences during our purchasing or entering into agreements with our suppliers. Also, the fund requirement and deployment for our strategies are based purely on management estimates and assumptions considering the current market scenario and are subject to revision in the light of changes in external circumstances or costs. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

17. *We are bound by the terms of agreement, MoU or contract for supply of majority of our steel products products due to which we may face limitations in supply from our current suppliers / vendors including pricing limitations and renewal terms*

We are a Company engaged in the trading and distribution of a variety of steel products and we enter into various distribution agreements / MoUs with major steel manufacturers across India for different steel products like Beams, Channels, Angles, TMT Bars, Steel Plates & Sheets, Steel Coils, etc. We currently are an authorised distributor for Jindal Steel & Power Limited (JSPL) and have entered into supply MoUs with Steel Authority of India Limited (SAIL) and Rashtriya Ispat Nigam Limited (RINL). Besides, we also enter into periodical agreements with various other steel manufacturers like Monet Ispat & Energy Limited (MIEL) and Vandana Ispat Limited to name a few. Accordingly, we are bound by the terms of such agreement / MoUs in relation to supply of their products, selling targets, pricing and inventory management.

Big national steel manufacturing companies are very particular about their pricing and may specify the pricing terms in their agreements. These pricings are based on the manufacturers' brand perception and may or may not be realisable in the market. This may lead to lower sales of that particular brand / product eventually resulting in higher inventory and dead stock. Also, the terms of the agreement may specify other parameters of trade like quantity, delivery terms, payment terms, all of which could affect our business process and in turn render us unable to dictate terms with our customers.

Furthermore, many of these big steel manufacturers may not be proactive in renewing their agreements. Majority of our agreements are for a period of not more than 1 year. Though we continue to undertake business transaction with them on oral basis, even after expiry of the original agreement, we cannot guarantee that we will be able to enforce the terms of business in case of old agreement. There can be no assurance that there will not be a significant disruption in the supply of the particular product from such manufacturer or, in the event of a disruption that we would be able to locate alternative suppliers of such product of the same quality and on terms acceptable to us, or at all. Identifying and negotiating with a new steel manufacturer involves a process that requires us to become satisfied with their market demand, quality control, responsiveness and service and financial stability. Non-availability or disruption in supply of any product may result in reducing our revenues by a considerable amount.

18. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoters & our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoters and Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoters and Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects. For further details of our transactions or interests of our promoters / promoter group, please refer the chapters titled "Our Business" and "Our Promoters, Promoter Group" and "Our Group Companies", "Related Party Transactions" and "Financial Information" beginning on page nos. 81, 121, 126, 130 and 36 respectively, of this Draft Prospectus.

19. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Proceeds from the Issue.*

Our Company intends to primarily use the Net Proceeds from the Issue towards repayment of debt as described in "Objects of the Issue" on page no. 59 of this Draft Prospectus. The fund requirements, the deployment of funds and the intended use of the Net Proceeds as described herein are based on our current business plan, management estimates and have not been appraised by any bank, financial institution or any other external agency. Also, in

terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹ 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue.

Given the dynamic nature of our business, we may have to revise our business plan from time to time and consequently our funding requirements and deployment on account of variety of factors such as our financial condition, business and strategy, including external factors such as market conditions, competitive environment, costs of commodities and interest/ exchange rate fluctuations which may not be within the control of our management. The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the Objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

20. *We sell our products in competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

The steel trading industry is highly competitive, coupled with the large number of players and also the existence of unorganised players. Also, several national and international steel manufacturers and brand owners have set-up their own distribution arms / have distribution tie-ups in India. With the high level of competition, our results of operations are sensitive to, and may be materially and adversely affected by, competitive pricing, services offered, brand recognition and other factors. Competition may result in pricing pressure, reduced profit margin or a failure to increase our market share, any of which could substantially harm our business and results of our operations.

We compete directly against national and local distributors of a variety of steel products, who are traders with substantial market share as well as established dealers of the manufacturers themselves with an increased access to stockist network as well as retailers and regional competitors in each of the region of our trade. Many of our competitors are established companies with strong brand recognition and a high number of product distribution agreements. Also, the steel distribution industry is fragmented in various regions of the country and many unorganized and local traders have a considerable market share. We compete primarily on the basis of timely delivery, quality, quick financing and overall customer relationship. In order to compete effectively, we must continue to maintain and develop our business model and reputation, enter into product distributor agreement / MoUs with renowned brands, including timely renewals and be flexible and innovative in responding to rapidly changing market demands and customer preferences and offer customers a wide variety of good quality products at competitive prices.

Many of our competitors have significant competitive advantages, including longer operating histories, larger and broader customer base, more established relationships with a broader set of steel manufacturer agreements and greater financial, research and development, marketing, distribution budgets and other resources than we do. The number of our direct competitors and the intensity of competition may increase as we expand into other product lines or as other smaller traders expand into other product lines. Our competitors may enter into business combinations or alliances. Our competitors may also be able to respond more quickly and effectively than we do to

new or changing opportunities, technologies, trends or customer preferences, which could result in a decline in our revenues. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

21. We constantly face a credit risk which may in turn affect our complete buying cycle adversely.

As a trading Company, our primary competence is the ability to market various categories of products in bulk quantities across Pan India and hence exploit the benefits of variety, economies of scale and credit shortage in the market. Our requirement of working capital is high mainly due to our ability to outright purchase and deliver huge amount of goods, thus relieving the vendor / manufacturer of its cost and storage issue. This stock is then sold by us to customers in various regions in India according to their demand and consequent orders places with us. In order to maintain trading relations and manage competition, we provide medium-term to long-term credit facilities to these customers. Our current Debtors turnover period is an average 65 days, depending on our relation with that customer. On the other hand, our suppliers are paid almost immediately i.e. within 1-2 days, depending on our trade relations and quantity of the order, thus leading to a high working capital gap.

Our aforementioned buying cycle is heavily dependent on timely payments being received from our customers who are situated in different parts of the country. If there is a default in payment from any of our customer or there is any unforeseeable delay in payment, our working capital cycle will be adversely affected. This may lead to our inability to extend further advance payments to our suppliers and thus lack the competitive advantage against our competitors leading to an adverse effect on our business operations and profitability.

22. Substantial portion of our revenues has been dependent upon our few customers. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.

We are a trading Company engaged in the sale and distribution of various structural and flat steel products. We sell our products to various industry segments mainly including engineering, infrastructure, construction and automobiles companies, to name a few, at various locations in India. For the financial years ended March 31, 2019 and March 31, 2018, our top ten (10) customers accounted for approximately 20% and 21% of our total revenues. The loss of a significant customer would have a material adverse effect on our financial results. A significant number of our customers are big multinational companies having multiple suppliers for their products and we cannot assure you that we can maintain our current levels of business from these customers or that we will be able to replace these customers in case we lose any of them. Also, any attempt to lower our dependence on our top customers, might expose us to credit risks and also affect our logistical set-up that we have with the existing customers. Furthermore, major events affecting our customers, such as bankruptcy, change of management, change in their country's policy and business framework, mergers and acquisitions, etc. could adversely impact our business. If any of our major customers becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our income and financial condition.

23. Our Company has reported certain negative cash flows from its operating activity, investing activity and financing activity, details of which are given below. Sustained negative cash flow could impact our growth and business

Our Company had reported certain negative cash flows from our operating activities, investing activities and financing activities in the previous three (3) years as per the restated financial statements and the same are summarised as under:

(₹ in lakhs)

Particulars	For the year ended		
	2019	2018	2017
Cash flow from Operating Activities	(571.23)	(1,739.74)	(28.25)
Cash flow from Investing Activities	(122.73)	(125.05)	1160.45
Cash flow from Financing Activities	711.61	1,861.24	(1,179.65)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

24. *Changes in pricing policy of various brands and products by the original manufacturer may affect the pricing for the goods acquired by us for distribution as we may not be able to always absorb the same.*

We enter into distribution agreements and MoUs with various steel product manufacturer and sell them to various customers who are spread across industry segments like EPC, infrastructure, construction, automobiles, etc. These steel manufacturer agreements / MoUs have a specific pricing clause and our Company is required to price the goods to our customers in accordance with the set terms. However, the original manufacturers may change the pricing of their products due to conditions inherent to their operations, which may affect our ability to sell the goods. If the price is lowered by the original manufacturers, we may have to lower the price too, thus affecting our profitability and financial results. Further, we are not able to lower the price simultaneously; our customers may opt for our competitors who were able to absorb the price reduction. This may affect not only our current transaction, but also our future relation with these customers, as they may prefer our competitors for all their future trades. Losing our customers could adversely affect our business operations and financial condition.

Further, in case of a price hike by the original manufacturers, we may not be able to successfully replicate the said hike, due various reasons like earlier commitments given to our customers, deals signed before the price hike information was received and / or to stay ahead in the competitive market scenario. In any of the above cases, we stand to lose the opportunity to improve our margins and our profitability. Also, the original manufacturers may object to our selling the product at a lower cost, thus affecting their brand image. The vendors may terminate our supply agreement or may not be willing to renew the same upon expiration, both of which will adversely affect our ability to maintain the supply and also lose the product category as part of our product portfolio. If any of the above were to occur, it may affect our liquidity and our ability to finance planned product and geographical expansion and our business operations and financial condition will be negatively affected.

25. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our traded products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, even though we may finalise the deal order with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent the delivery of the orders placed will be made. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business.

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

26. *We have availed of certain loans from Banks, pursuant to the Financing Agreements that we have entered into with them. Pursuant to the terms of such agreements, we require consents from the respective Bankers for a number of corporate actions, including for undertaking this Issue & repayment of unsecured loan, which have not been obtained as on date. Any failure to obtain such consents on a timely basis may result in a delay in the Issue.*

Pursuant to the Financing Agreements entered into by us with the Bankers, we are required to obtain consents from the respective Bankers to undertake certain actions, including this Issue and for completion of the requirements pertaining to this Issue. Though, we have informed our bankers orally of our intention to undertake this Issue, we have not obtained consents from these bankers and the same are awaited. Also, our bankers have specific negative covenant for re-payment of unsecured loans taken from Directors & their relatives, which is the proposed object of this Issue. However, considering that the repayment of the loan as per the proposed objects of this Issue, we are increasing our equity capital & networth, it would not make a material difference to the Bankers and hence we believe that the Bankers shall provide their NoC and / or Consent for the same on a timely manner. While our Company intends to obtain all the necessary NoC and / or consents in relation to this Issue from our bankers prior to the filing of the Prospectus with the RoC, any delay in obtaining the same may result in delay in undertaking this Issue, thus affecting our future plans and strategies.

27. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- To make any change in the constitution without the prior written Consent.
- To avail any loan from any Bank or financial institution which increases indebtedness beyond permitted limits without the prior written consent.
- To create or allow to exist any encumbrance or security over assets specifically charged with the bank, without any prior written consent.
- To have any additional current accounts with other Banks, without the knowledge and written consent of the Bank;
- To declare dividends/ withdraw any amount in any form of salary/ remuneration by the Promoter/ Directors in case of overdue with the Bank.
- To change directors/ ownership/ Promoter/ major shareholders without the written consent of the Bank.
- To utilize the funds for the purposes other than for which they have been lent without prior written Consent.

Further the Company has created a charge on its assets in favour of their bankers against the assets of the Company. In case of default by the Company in repayment of the loans, bankers may exercise their rights over the security, which may be detrimental to the interest of the Company. For details, please refer "*Financial Indebtedness*" on page no. 164 of this Draft Prospectus.

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our borrowings are secured by our movable, immovable or tangible assets (whether existing or future) and by a personal guarantee of our Promoters / Promoter Group. Such securities enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

28. *We are required to incur substantial expenditure for our business operations and if we are not able to manage our financial requirements in the future, we may be required to obtain additional financing which may not be on terms commercially acceptable to us.*

We are required to incur substantial expenditure for conducting our business operations primarily in relation to making payments to our suppliers who extend limited credit period to us. The actual amount and timing of our future capital requirements may differ from estimated requirements as a result of, amongst other things, unforeseen delays in obtaining orders, confirmation of required products and brands from our suppliers, price fluctuations in various products and brands, changes in business plans due to prevailing economic conditions, unanticipated

expenses and regulatory changes in the States of our trade. If we are not able to manage our financial requirements from our internal accruals in the future, we may be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with various restrictive covenants that are generally part of such financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact the price of our Equity Share.

Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all which could adversely impact our planned capital expenditure and our business.

- 29. *We are yet to make an application seeking registration of trademark of our “”. There is no assurance that this application shall result in us being granted registration in a timely manner. Failure to protect our intellectual property may adversely affect our reputation, goodwill and business operations***

We have not yet applied for registration of our name and logo under the provisions of the Trademarks Act, 1999. As such, we do not enjoy the statutory protection accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

- 30. *Conflicts of interest may arise out of common business undertaken by our Company and our Promoter Group Entities.***

Certain of our Promoter Group entities, including partnership firms; M/s. Hariom Steels and M/s. Jatin Kishir & Co, are authorized by their charters / memorandum to carry similar activities as those conducted by our Company. Though, these Promoter Group firms may not have the exact product range, client base and supplier network as our Company, however they are authorised by their respective charters to carry the same business. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Promoter Group entities in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other firms in which our Promoters or their immediate relatives have interests. There can be no assurance that our Promoters or members & entities of our Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

- 31. *We are dependent on certain steel manufacturers / steel brand for promotion of our products. An inability by the manufacturer / brand owners to adequately promote its products and / or adequately protect its trademarks may result in loss of goodwill and business and adversely affect our business prospects, results of operations and financial condition.***

Our Company is engaged in the business of distribution various types of steel products, including structural steel and flat steel products. We have entered into distribution agreements / MoUs with several of our suppliers for different products. For e.g. We procure TMT Bars from Jindal Steel and Power Ltd. (JSPL) under its brand name of Panther TMT. Though we sell the product under the brand name panther TMT, we do not directly undertake any branding activity for such product. The owner of the brand, or in this case JSPL, is primarily responsible for consumer marketing and brand promotion. Currently, while do not make any contribution to the brand marketing costs, we could be asked in future by these brand owners / manufacturers to share such expenses. We are under no obligation to make such contribution or maintain funding levels in future, and our ability to expand our product range would depend on product expansion strategy carried out by the brand owners.

Further, if there is a slowdown in the demand of this product or a negative publicity of the product due to various reasons beyond our control, then we may not be able to sell our existing stock, or may have to sell it at prices below our purchase prices, leading to loss or write-offs. A decrease in marketing efforts and expenditure by brand owners / manufacturers, in contribution to its marketing plan or in its commitment to the development and

introduction quality products may adversely affect our business prospects, results of operations and financial condition.

32. Our Group Company(s) have incurred losses during the last three financial years

Our Group Company has incurred losses in one out of the last three financial years, details of which are as under:

(₹ in lakhs)

Name of the Company	March 31, 2019	March 31, 2018	March 31, 2017
Mobi Realtors Private Limited	-	(0.09)	(8.69)

33. Our Promoters together with our Promoter Group will continue to retain majority shareholding in our Company subsequent to the Issue, which will allow them to exercise significant influence over our Company. We cannot assure you that our Promoters and/or our Promoter Group will always act in our Company's or your best interest.

Currently 100% of our issued and outstanding Equity Shares are beneficially owned by our Promoters and our Promoter Group. Upon completion of the Issue, our Promoters and Promoter Group will own 1,00,00,400 Equity Shares, or 73.53% of our post-Issue Equity Share capital. Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board, the adoption of amendments to our memorandum and articles of association, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters and Promoter Group as our Company's controlling shareholders could conflict with our Company's interests or the interests of its other shareholders. We cannot assure you that the Promoters and Promoter Group will act to resolve any conflicts of interest in our Company's or the shareholders favour.

34. Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.

We are involved in the trading of various steel products and we deliver the same. Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the products. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us. Although Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases.

35. Some of the properties mortgaged for our secured loans do not belong to us and are owned by our Promoters / Promoter Group. Further, our Promoters / Directors have extended personal guarantees in connection with our debt facilities. There can be no assurance that such properties and personal guarantees will be continued to be provided by our Promoters / Promoter Group & Directors in the future or can be called at any time, affecting our financial condition.

Our Company has obtained Working Capital loans from banks for a total loan sanction amount ₹6,800 lakhs. The said loan amount is secured by various immovable properties, some of which are not owned by our Company. These properties are owned by our Promoters and Promoter Group entities. If our Promoters / Promoter Group withdraw, sell or dispose off, any of these properties or decide not to continue as a security for our loan due to any reason, we may require alternative properties of an equal or greater value. We cannot assure you that we will be able to acquire such a property within reasonable time and of the desired value or at all. If we are unable to arrange suitable collateral within the stipulated time, we may be required to repay a substantial portion of the loan. In order to arrange for collateral, we may have to acquire properties at commercially unviable terms or with unviable prospects, which may lead to a large capital out flow, adversely affecting our cash flow condition and financial stability.

Further, our Promoters / Directors have provided personal / corporate guarantees for the above mentioned borrowings to secure our loans. If these personal / corporate guarantees are revoked, our lenders may require

alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters / Directors in connection with our Company's borrowings.

36. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

37. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations and financial condition.*

Our business and assets could suffer damage from fire, natural calamities and the goods transported to our customers by our supplier could suffer from damage, misappropriation or other causes, resulting in losses, which may not be covered / fully compensated by insurance. Legal proceedings or other actions may be initiated against us or any of our employees for acts and conduct of our employees which may occur due to various reasons including misconduct with customers. In the event of personal injuries, damage or other accidents suffered by our employees or our customers or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries. Our principal types of insurance coverage include standard fire and special perils policy and vehicle policy for registered office and cranes at the godown.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our businesses, we cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance which exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further details on our insurance arrangements, see "Insurance – Our Business" on page no. 81 of this Draft Prospectus.

38. *We have not made any alternate arrangements for repaying the unsecured loans for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for repaying our unsecured loans as per the Objects of the Issue. Over the period of time, we have met our capital requirements through Director / Promoters' unsecured loans. Any shortfall in our net cash flows, internal accruals and our inability to raise institutional debt in future would result in us being unable to repay these unsecured loans, which are repayable on demand, which in turn may increase our financial costs, affect our Promoter's / Director's liquidity and restrict future funding from our Directors in urgent situations, thus negatively affecting our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer "Objects of the Issue" on page no. 59 of this Draft Prospectus.

39. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

40. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

41. *The Equity Shares issued pursuant to the Issue may not be listed on the Stock Exchange(s) in a timely manner, or at all, and any trading closures at the Stock Exchange(s) may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in developed economies. The Stock Exchanges have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of the Equity Shares.

42. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

43. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to

the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of steel manufacturing and distribution companies generally;
- Performance of our competitors in the steel trading and distribution industry and the perception in the market about investments in the Trading sector;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share.

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

44. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

45. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, upto an amount of Rs. 1 lakh, if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon

the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

46. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

We are a Steel trading company. Our future ability to pay dividends will depend on the earnings, financial condition and capital requirements of our Company. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. We cannot assure you that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all.

Our business is working capital intensive and we may plan to invest additional working capital expenditures to effect purchase of inventory or pay creditors. Our ability to pay dividends could also be restricted under certain financing arrangements that we may enter into. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements for the products proposed to be purchased, financial condition and results of operations.

EXTERNAL RISK FACTORS

47. *Any change in the government policies in India or that of any State in India vis-à-vis expenditure, subsidies and policies etc. in the trading sector and also in various other rules in India could affect our ability to carry on our trade, thereby affecting our business and profitability.*

Any changes in government policies in India or that of any State in India, relating to the steel industry and also the distribution and trading industry such as reduction of government expenditure, withdrawal or changes in incentives and subsidy systems, or adverse changes in overall prices and / or minimum support prices could have an adverse effect on the ability of various traders and stockists to spend on a large variety of traded products.

Our ability to exploit the prices for different products used in a varied industry segments may be restricted by the various government policies and restrictions and our profits may be affected accordingly. End users of our various steel products may seek to find ways to reduce or contain related costs. We cannot predict the nature of the measures that may be adopted by governments or private organisations or their impact on our revenues. In the event such measures result in increased costs for our suppliers to undertake the trading activity, their concentration in this area may reduce which could affect our supply chain and our overall revenues may decrease and our cash flows and profits could be adversely affected even in cases where the demand for our products increases.

48. *Surge in cheap imports have led to increased pressure on domestic steel trading companies.*

Domestic producers and traders are suffering from pressure of a rise in cheap imports and low domestic steel prices, which threatens to wipe out the healthy profits made in the past years, happening due to the existing US-China trade war. The steel companies have had to communicate with the Government and the Ministry multiple times over the issue of dumping of various grades of low cost steel into Indian market by countries like China, Japan, South Korea and Vietnam, and stealing market share.

The Companies and the Government are trying to protect our borders by making sure that goods which enter into India are not disrupting the prices as well as the quality of the goods and hurting the domestic steel industry. Hence, Indian Government has been monitoring the impact of imported cheaper steel from China on domestic industry. In a bid to support use of locally made steel, the ministry has urged automakers to cut imports from Japan and Korea.

We cannot ensure that any of the Government's initiative towards this issue will reduce the pressure on the Company in the future. The availability of cheaper imported steel may lead to a reduction in demand of our traded goods and further affect our operations.

49. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, financial condition, results of operations and prospects.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "Key Industry Regulations and Policies" on page no. 95 of this Draft Prospectus for details of the laws currently

applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

50. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

51. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the Steel industry, including its trading and distribution, has been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled 'Our Industry' beginning on page no. 69 of this Draft Prospectus. Due to possibly flawed or ineffective data or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and we have placed our reliance on the such publically available data.

52. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities in India or any region of our trade may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

53. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war in any region of our trade may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India, Africa and Middle East are regions that have witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in any such region could have a negative impact on the value of business and eventually the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

54. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “Presentation of Financial, Industry and Market Data” on page no. 69 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

55. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

56. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker

defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

OVERVIEW OF GLOBAL ECONOMY

According to the May 2018 OECD Economic Outlook, world GDP growth is forecast to be around 4% in the coming years (3.8% in 2018 and 3.9% in 2019). Nevertheless, economic growth is benefiting largely from accommodative monetary and fiscal policies, whereas in most economies the implementation of necessary structural reforms has stalled (OECD, 2018[1]). There are therefore significant downside risks to the GDP growth forecast due to the inevitable phasing out of central bank and government fiscal support. In the euro area, GDP growth is projected to remain above 2% in 2018 and 2019, with a broad based recovery driven by both domestic and external demand — private consumption and investment are being supported by the accommodative monetary and fiscal policy stance. A high level of indebtedness in both the household and the corporate sector, as well as a large stock of nonperforming loans in some economies still have the potential to negatively affect future growth. Brexit is also a downside risk for E.U. countries should a workable trade agreement not be found prior to the United Kingdom leaving the European Union.

In the U.S., the economy has felt the effects of a substantial fiscal boost. Employment growth remains robust which, coupled with buoyant asset prices and strong consumer confidence, is sustaining income and consumption growth. Business investment is projected to strengthen as a result of major tax reforms and supportive financial conditions. GDP growth projections stand at 2.9% in 2018, and 2.8% in 2019. The main downside risks are a correction in asset prices, including in the housing sector, high leverage in the corporate sector and trade frictions that could jeopardise the growth-inducing effects of global value chains, and result in further tensions and increase in trade measures. In Japan, economic growth is projected to be 1.2% both in 2018 and 2019, supported by exports, business investment and private consumption. The level of government debt (224% of GDP) is extremely high and poses serious downside risks. A loss of confidence in Japan's fiscal sustainability could destabilise the financial sector and the real economy, with potentially large negative spill-overs to the world economy. The escalation of trade actions is also a significant risk, although the recently signed Comprehensive and Progressive Agreement for Trans-Pacific Partnership (TPP-11) could help mitigate it.

Economic growth in emerging economies varies depending on the degree of exposure to commodity markets, progress in the implementation of structural reforms, the extent of financial vulnerabilities, and the different demand-side policies being implemented. In China, economic growth should soften as export and investment growth rates slow. GDP growth is projected at 6.7% in 2018 and 6.4% in 2019. Monetary policy has been tightened in order to curb excessive financial risks, while fiscal policy remains accommodative but should become tighter because of better scrutiny over unauthorised local government investments.

The Belt and Road Initiative is expected to keep infrastructure investment and exports strong. Potential headwinds to economic growth going forward include the risks of a real estate market downturn, the rise of non-performing loans due to a high level of corporate indebtedness (particularly amongst state-owned enterprises) and increased trade actions. In India, investment and exports have become major growth engines, supported by adjustments in how the new goods and services tax (GST) is implemented.¹ Private consumption was negatively affected by the confidence and employment shocks associated with demonetization (a measure to reduce the black market economy), but the recovery seems well underway. Nevertheless, job creation in the formal sector is expected to remain sluggish, leaving the vast majority of workers in low-productivity, low-paid activities. The OECD forecast points to GDP growth rates of 7.4% in 2018, and 7.5% in 2019. In the longer run, the new GST should continue to sustain corporate investment, productivity and growth by creating a single market and reducing the cost of capital equipment. Private investment is likely to accelerate, as deleveraging by corporations and banks continues to incentivise investors and infrastructure projects mature. Exports will strengthen thanks to competitiveness gains resulting from the implementation of the GST. In the Russian Federation (hereafter “Russia”), the economy is projected to continue growing at a modest pace: 1.8% in 2018 and 1.5% in 2019. Private consumption and investment should benefit from a confidence boost from higher oil prices and macroeconomic policies that have improved financial conditions. Modest income growth is nevertheless keeping

inequality and poverty at high levels. Oil price uncertainty, international sanctions and a decreasing workforce are likely to continue weighing on economic activity. In Brazil, the recovery is projected to continue to strengthen and GDP growth is expected to reach 2.0% in 2018 and 2.8% in 2019. Solid investment growth reflects improving confidence due to recent reforms, particularly in financial markets. Downside risks include high corporate indebtedness, with a possible deterioration in loan quality, as well as fiscal sustainability that absent pension reforms could jeopardise investor confidence.

OVERVIEW OF INDIAN ECONOMY

Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

Market size

India's GDP is estimated to have increased 7.2 per cent in 2017-18 and 7 per cent in 2018-19. India has retained its position as the third largest startup base in the world with over 4,750 technology start-ups. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 405.64 billion in the week up to March 15, 2019, according to data from the RBI.

Recent Developments

With the improvement in the economic scenario, there have been various investments in various sectors of the economy. The M&A activity in India reached record US\$ 129.4 billion in 2018 while private equity (PE) and venture capital (VC) investments reached US\$ 20.5 billion. Some of the important recent developments in Indian economy are as follows:

- During 2018-19 (up to February 2019), merchandise exports from India have increased 8.85 per cent year-on-year to US\$ 298.47 billion, while services exports have grown 8.54 per cent year-on-year to US\$ 185.51 billion.

- India's Foreign Direct Investment (FDI) equity inflows reached US\$ 409.15 billion between April 2000 and December 2018, with maximum contribution from services, computer software and hardware, telecommunications, construction, trading and automobiles.
- India's Index of Industrial Production (IIP) rose 4.4 per cent year-on-year in 2018-19 (up to January 2019).
- Consumer Price Index (CPI) inflation stood at 2.57 per cent in February 2019.
- Net employment generation in the country reached a 17-month high in January 2019.

Government Initiatives

The interim Union Budget for 2019-20 was announced by Mr Piyush Goyal, Union Minister for Finance, Corporate Affairs, Railways and Coal, Government of India, in Parliament on February 01, 2019. It focuses on supporting the needy farmers, economically less privileged, workers in the unorganised sector and salaried employees, while continuing the Government of India's push towards better physical and social infrastructure. Total expenditure for 2019-20 is budgeted at Rs 2,784,200 crore (US\$ 391.53 billion), an increase of 13.30 per cent from 2018-19 (revised estimates). Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy. Some of the recent initiatives and developments undertaken by the government are listed below:

- In February 2019, the Government of India approved the National Policy on Software Products – 2019, to develop the country as a software hub.
- The National Mineral Policy 2019, National Electronics Policy 2019 and Faster Adoption and Manufacturing of (Hybrid) and Electric Vehicles (FAME II) have also been approved by the Government of India in 2019.
- Village electrification in India was completed in April 2018. Universal household electrification is expected to be achieved by March 2019 end.
- The Government of India released the maiden Agriculture Export Policy, 2018 which seeks to double agricultural exports from the country to US\$ 60 billion by 2022.
- Around 1.29 million houses have been constructed up to December 24, 2018, under Government of India's housing scheme named Pradhan Mantri Awas Yojana (Urban).
- Prime Minister's Employment Generation Programme (PMEGP) will be continued with an outlay of Rs 5,500 crore (US\$ 755.36 million) for three years from 2017-18 to 2019-20, according to the Cabinet Committee on Economic Affairs (CCEA).

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms. India's revenue receipts are estimated to touch Rs 28-30 trillion (US\$ 385-412 billion) by 2019, owing to Government of India's measures to strengthen infrastructure and reforms like demonetisation and Goods and Services Tax (GST). India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from 175 GW by 2022. India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers. Exchange Rate Used: INR 1 = US\$ 0.0145 as on March 29, 2019

GLOBAL STEEL INDUSTRY

The global steel demand continues to grow in slowing economic environment. The World Steel Association forecasts global steel demand will reach 1,735 Mt in 2019, an increase of 1.3% over 2018. In 2020, demand is projected to grow by 1.0% to reach 1,752 Mt. Commenting on the outlook, Mr Al Remeithi, Chairman of the worldsteel Economics Committee said, "In 2019 and 2020, global steel demand is expected to continue to grow, but growth rates will moderate in tandem with a slowing global economy. Uncertainty over the trade environment and volatility in the financial markets have not yet subsided and could pose downside risks to this forecast."

Growth in steel demand remains positive

In 2018, global steel demand increased by 2.1% (after adjusting for China induction furnace closures – see note in October 2018 Short Range Outlook), growing slightly slower than in 2017. In 2019 and 2020 growth is still expected, but in a less favourable economic environment. China's deceleration, a slowing global economy, and uncertainty surrounding trade policies and the political situation in many regions suggest a possible moderation in business confidence and investment.

Chinese steel demand remains robust owing to government stimuli

Chinese steel demand continues to decelerate as the combined effect of economic rebalancing and trade tension is leading to slowing investment and sluggish manufacturing performance. Mild government stimulus cushioned the economic slowdown in 2018. In 2019, the government is likely to heighten the level of stimulus, which is expected to boost steel demand. In 2020, a minor contraction in Chinese steel demand is forecasted as the stimulus effects are expected to subside.

Steel demand in the developed world reacts to a weaker trade environment

- Steel demand in the developed economies grew by 1.8% in 2018 following a resilient 3.1% growth in 2017. We expect demand to further decelerate to 0.3% in 2019 and 0.7% in 2020, reflecting a deteriorating trade environment.
- In 2017-18, steel demand in the US benefitted from the strong growth of the economy driven by government-led fiscal stimulus, leading to high confidence and a robust job market. In 2019, the US growth pattern is expected to slow with the waning effect of fiscal stimulus and a monetary policy normalisation. Therefore, both construction and manufacturing growth is expected to moderate. Investment in oil and gas exploration is expected to decelerate as well, while a boost in infrastructure spending is not expected.
- The EU economies also face the deteriorating trade environment and uncertainty over Brexit. We expect slower growth in demand for steel in the major EU economies (especially in those more export dependent) in 2019. Steel demand growth is expected to improve in 2020, dependent on a reduction in trade tensions.
- Japan recorded growth in steel demand in 2018, supported by a favourable investment environment and continued construction activities as well as a boost in consumer spending prior to the consumption tax increase. In 2019 and

2020, steel demand is likely to contract slightly due to a moderation of construction activities and decelerating exports despite the support provided by public projects.

- Steel demand in Korea has been contracting since 2017 due to reduced demand from two major steel using sectors, shipbuilding and automotive. Steel demand is expected to continue declining in 2019 due to toughened real estate market measures and a deteriorating export environment. A mild recovery is expected in 2020.

World Steel Trade

Monthly data from the International Steel Statistics Bureau (ISSB), taking into account internal E.U. and other inter-regional trade, point to global steel exports averaging around 35-36 million tonnes per month during the first three months of 2018, down from around 37-39 million tonnes in 2017. The world export ratio, i.e. exports as a share of crude steel production in 2018 (Figure 5.A), has been declining slightly when compared to levels in 2017. The world export ratio stood at 25.7% in March 2018, falling to the same level as in the beginning of 2014. Excluding intra-E.U. trade, monthly global steel exports have been declining slightly from around 27-28 million tonnes during 2017 to around 26 million tonnes during the first three months of 2018. The export ratio (excluding intra-E.U. trade) has also been declining, falling to 20.8% in March 2018, down from 22.7% in March 2017

Global Steel Production

2019 had opened on an optimistic mode with global steel prices in general remaining northbound. The momentum had continued into the second month of the new year as well, with prices responding largely to market demand-supply pattern and raw material price impact. While Chinese controls on capacity/production growth remained in force, the limelight has now shifted to the Brazil and iron ore availability, post developments at Vale, which announced production cuts of 40 mtpa due to the decommissioning of all its upstream tailings dams in Brazil. Moreover, according to a new resolution issued by the country's mining agency, local mining companies that operate 'upstream' tailings dams will have to completely decommission them by August 15, 2023.

Long Product

- USA rebar prices stood steady in February 2019, with market sentiments on the upswing given the rise in shredded scrap prices and increased demand with the arrival of spring season. Transactions, as per Metal Bulletin reports, were quoted around \$710/t at month end.
- EU rebar prices largely remained flat in February 2019 in view of tepid demand conditions. Transactions, as per Metal Bulletin reports, were quoted around €510-520/t (\$580-591) in Southern Europe and around €535-550/t (\$608-625) in Northern Europe.
- China's rebar prices saw limited rebound in February 2019 with the pace of their procurement picking up but not to the extent expected. Transactions, as per Metal Bulletin reports, were quoted around 3,740-3,790 yuan/t (\$559-567) in Shanghai and around 3,730- 3,780 yuan/t in Beijing.
- Seasonal rebound led Russian rebar prices move north in February 2019. Metal Bulletin's price assessment for domestic 12mm A500C rebar in Russia, including 20% VAT, was 36,000-38,500 roubles/t (\$543-581) cpt Moscow at month-end.

Flat Product

- USA HRC prices remained steady in February 2019 as market participants decided to wait and watch over price movements. Transactions, as per Metal Bulletin reports, were quoted around \$670-680/t at month-end.
- EU HRC prices showed limited movement in February 2019 largely in view of demand conditions. Transactions, as per Metal Bulletin reports, were quoted around €485-510/t (\$551-580) in Southern Europe and around €505-520/t in Northern Europe.

- February 2019 saw Chinese HRC prices move north following trends in the futures market and in anticipation of supply shortage. Transactions, as per Metal Bulletin reports, were quoted around 3,800-3,830 yuan/t (\$567-572) in Shanghai and around 3,740-3,770 yuan/t in Tianjin.
- Like rebar, seasonal rebound led Russian HRC prices move north in February 2019. Metal Bulletin's price assessment for Russia-origin 4mm HR sheet was at 41,200-41,600 roubles/t (\$627-633) cpt Moscow at month-end.

INDIAN STEEL INDUSTRY

Introduction

India was the world's second-largest steel producer with production standing at 106.5 MT in 2018. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output. The Indian steel industry is very modern with state-of-the-art steel mills. It has always strived for continuous modernisation and up-gradation of older plants and higher energy efficiency levels. Indian steel industries are classified into three categories such as major producers, main producers and secondary producers.

Market Size

India's finished steel consumption grew at a CAGR of 5.69 per cent during FY08-FY18 to reach 90.68 MT. India's crude steel and finished steel production increased to 103.13 MT and 104.98 MT in 2017-18, respectively. In 2017-18, the country's finished steel exports increased 17 per cent year-on-year to 9.62 million tonnes (MT), as compared to 8.24 MT in 2016-17. Exports and imports of finished steel stood at 5.77 MT and 7.13 MT, during April 2018-February 2019 (P).

Investments

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past. According to the data released by Department for Promotion of Industry and Internal Trade (DPIIT), the Indian metallurgical industries attracted Foreign Direct Investments (FDI) to the tune of US\$ 11.18 billion in the period April 2000–December 2018. Some of the major investments in the Indian steel industry are as follows:

- As of December 2018, Vedanta Group is going to set up a one million tonne capacity steel plant in Jharkhand with an investment of Rs 22,000 crore (US\$ 3.13 billion).
- JSW Steel will be looking to further enhance the capacity of its Vijayanagar plant from 13 MTPA to 18 MTPA. In June 2018, the company had announced plans to expand the plant's production capacity to 13 MTPA by 2020 with an investment of Rs 7,500 crore (US\$ 1.12 billion).
- Vedanta Star Ltd has outbid other companies to acquire Electrosteel Steels for US\$ 825.45 million.
- Tata Steel won the bid to acquire Bhushan Steel by offering a consideration of US\$ 5,461.60 million.
- JSW Steel has planned a US\$ 4.14 billion capital expenditure programme to increase its overall steel output capacity from 18 million tonnes to 23 million tonnes by 2020.
- In March 2019, ArcelorMittal was declared as the winning bidder to acquire Essar Steel for a consideration of Rs 42,000 crore (US\$ 5.82 billion).
- Tata Steel has decided to increase the capacity of its Kalinganagar integrated steel plant from 3 million tonnes to 8 million tonnes at an investment of US\$ 3.64 billion.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- An export duty of 30 per cent has been levied on iron ore[^] (lumps and fines) to ensure supply to domestic steel industry.

- Government of India's focus on infrastructure and restarting road projects is aiding the boost in demand for steel. Also, further likely acceleration in rural economy and infrastructure is expected to lead to growth in demand for steel.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 envisages 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030-31.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs 200 crore (US\$ 30 million).
- The Government of India raised import duty on most steel items twice, each time by 2.5 per cent and imposed measures including anti-dumping and safeguard duties on iron and steel items.

Road ahead

The National Steel Policy, 2017, has envisaged 300 million tonnes of production capacity by 2030-31. In 2018, steel consumption of the country is expected to grow 5.7 per cent year-on-year to 92.1 MT. Further, India is expected to surpass USA to become the world's second largest steel consumer in 2019.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Indian Steel Demand

The January to November crude steel production statistics released by worldsteel on 20 December 2018 show that India has become the second largest steel producer in the world, overtaking Japan for the second month in a row, with a growth rate of 4.9%. The growth in steel production is supported by fast-growing steel demand. According to worldsteel's October Short Range Outlook, it is likely that India will also become #2 in steel use by the end of 2019 as its steel demand is expected to grow by 7.3%. The Indian steel industry, after recovering from the twin shocks of demonetisation and the Goods and Services Tax (GST) reform, is one of the few bright spots for the world's steel industry in what is forecasted to be a lower growth era.

What is driving India's steel demand?

- India's apparent steel use per capita for finished steel products stood at 66.2 kg, way below the world average of 212.3 kg in 2017, which suggests that India has a huge unrealised potential for steel demand growth. Recently, India has been trying to unleash this through an extensive reform agenda to clear institutional bottlenecks. Also, there is an ongoing push for infrastructure development. These factors, along with the favourable demographics, are improving the macroeconomic fundamentals, which translate into sustained growth in steel use. A world steel study of India, conducted in collaboration with the Indian Steel Association and the support of Indian member companies, identifies the construction sector as a pan-India steel demand driver on the back of strong infrastructure development and housing demand, especially affordable housing.
- Projects like industrial corridors (connecting existing industrial cities and develop manufacturing sectors) and Sagarmala (connecting states through waterways) will increase India's connectivity, reducing logistical costs of transportation across Indian states. The Smart Cities initiatives will further boost urban infrastructure investment. There are currently 99 smart cities planned across India. The outlook for India's manufacturing sector, which has

been lagging behind the service sector as a growth driver, should improve. Firstly, the Make in India initiative, which aims to transform India into a global design and manufacturing hub, will support the further development of steel using sectors along the industrial and freight corridors. Secondly, many states are expected to develop automotive and ancillary industries, to be a global auto hub for small cars with a focus on exports. Lastly, some states are also expected to strengthen their mechanical machinery sector. All these factors point to a high potential for steel demand growth in India, but how fast the potential can be realised will depend upon whether India can successfully implement both its reform agenda and infrastructure plans.

Steel Prices in India

Price regulation of iron & steel was abolished on 16.1.1992. Since then steel prices are determined by the interplay of market forces. Domestic steel prices are influenced by trends in raw material prices, demand – supply conditions in the market, international price trends among others. An Inter-Ministerial Group (IMG) is functioning in the Ministry of Steel, under the Chairmanship of Secretary (Steel) to monitor and coordinate major steel investments in the country. As a facilitator, the Government monitors the steel market conditions and adopts fiscal and other policy measures based on its assessment. Currently, GST of 18% is applicable on steel and there is no export duty on steel items. The government has also imposed export duty of 30% on all forms of iron ore except low grade (below Fe 58%) iron ore lump & fines and iron ore pellets both of which have nil export duty. In view of rising imports, the Government had earlier raised import duty on most steel items twice, each time by 2.5% and imposed a gamut of measures including anti-dumping and safeguard duties on a host of applicable iron and steel items. In a further move to curb steel imports, the Indian government banned the production and sale of steel products that does not meet Bureau of Indian Standard (BIS) approval and to check the sale of defective and sub-standard stainless steel products used for making utensils and kitchen appliances, it issued the Stainless Steel (Quality Control) Order, 2016 for products used in making utensils and kitchen appliances, that will help filter imports of the metal. Again, in February 2016, the Indian Government had imposed the Minimum Import Price (MIP) condition on 173 steel products. The MIP was extended thrice and ceased to be effective in February 2017. Currently, a mix of anti-dumping /safeguard and other measures are in place on a range of steel items to control the inflow of cheap steel. Further, a Steel Price Monitoring Committee has been constituted by the Government with the aim to monitor price rationalization, analyze price fluctuations and advise all concerned regarding any irrational price behaviour of steel commodity.

Import of Steel in India

India is the world's fifteenth-largest steel importer. In 2017, India imported 8.9 million metric tons of steel, a 9.7 percent decrease from 9.8 million metric tons in 2016. India's steel imports represented 2.6 percent of all steel imported globally in 2016, based on available data. The volume of India's 2017 steel imports was about a quarter of the size of the world's largest importer, the United States. In value terms, steel represented just 1.7 percent of the total amount of goods imported into India in 2017. India imports steel from over 80 countries and territories. The 5 countries highlighted in the map below represent the top import sources for India's imports of steel, with each sending more than 250 thousand metric tons and together accounting for about 80.0 percent of India's steel imports in 2017. India's volume of steel imports hit a peak in 2015 at 13.3 million metric tons — a jump of 41.4 percent from 9.4 million metric tons in 2014. Imports in 2016 decreased 25.8 percent to 9.8 million metric tons and continued to decline in 2017, reaching 8.9 million metric tons. Despite this decrease, the value of India's 2017 imports rose to \$7.4 billion, nearly a 10.0 percent increase from the \$6.7 billion in 2016. Flat products account for the lion's share of India's steel imports. In 2017, about 70.0 percent, or 6.3 million metric tons, of India's steel imports were of flat products. Long products accounted for 11.4 percent, or 1.0 million metric tons, followed by stainless steel at 7.0 percent (618.7 thousand metric tons), semi-finished steel at 6.1 percent (545.5 thousand metric tons), and pipe and tube products at 5.2 percent (464.7 thousand metric tons). Imports by Top Source The top 5 source countries for India's steel imports represented about 79.0 percent of the total steel import volume in 2017 at 7.0 million metric tons (mmt). Our Company’s business is a broad based distribution model, based on multiple steel products. The focus is to establish ourselves and capture a considerable market share in each of the steel product categories like beams, plates, angles, bars, etc. This helps to spread our market risks arising out of fluctuation in the market shares of various steel products and brands besides helping us to achieve economies of scale.

We mainly play a connecting role and support the manufacturers’ demand generation activities through trade marketing. Our Company’s operating model represents the indirect sales model and we play the role of supply chain consolidator between several steel manufacturers and the end users of the steel products. The key deliverables here are logistics, inventory management, credit and delivery at cost effective prices to the customers. Thus our business require stocking of various steel products at our dedicated godown and is working capital intensive.

Our product range of steel traded by us consists of both flat and long products. Following is the classification of product offerings of our Company:

Accordingly, we generally keep a high inventory and cater to the customers' needs by providing them customised product, i.e. by size, length, dimension, etc., in the least possible time.

The details of our product portfolio are given below:

LONG STEEL PRODUCTS (STRUCTURAL STEEL)

- Parallel Flange Beam

The Parallel Flange Beams come in different shapes depending upon the width & depth of the beam and are generally known as I-beam and H-beam. The H-beam has wider flanges than an I-beam, while the I-beam has tapered edges. Thus the main difference between both H-beams and I-beams is the flange by web ratio. The types beams further vary

based on the thickness of the web & flanges and also based on the thickness of the root radius. Structurally, the H-beam tends to be heavier than the I-beam.

The Beam is one of the most integral part of construction structure and it is the structural element that is capable of withstanding load primarily by resisting bending. The load may be a brick or stone wall above the opening, a floor or roof in a building or longitudinal beams in a bridge deck.

- **Angles**

Angles or MS Angles are are L-shaped structural steel represented by dimension of sides & thickness. There are mainly two types of angles, L shaped angles & T shaped angles.

Further, L shaped angles have a further classification based on sizes of angles i.e. equal & unequal angles. Equal Angles are angles having both the sides of equal dimensions, whereas unequal angles are angles in which one of the sides is bigger in dimension than the other.

L shaped and T shapes angles are one of the most important parts in any construction. Angles are used for construction of bridges, buildings, factory sheds, manufacturing of truck-trailers, EOT cranes and Gantry, construction and installation of escalators and elevators, ship, bus body, conveyors, boilers, agricultural equipment & scaffolding and many more fabrication and engineering industries.

- **Channels**

A steel channel is a versatile product that is available in many sizes and thicknesses. Its cross-section is shaped like a squared-off C, with a straight back and two perpendicular extensions on the top and bottom. Compared to other structural steel products, such as I-beams, steel channel is lighter and slightly more flexible, though it offers less torsional strength, making it prone to twisting under certain conditions.

Steel Channels have wide scale applications and are one of the most popular parts in construction and manufacturing with uses in tracks & sliders for machines, doorways, etc., posts and supports for building corners, walls & railings, protective edges for walls, decorative elements for constructions like ceiling channel system, frames or framing material for construction, machines. All major construction structure and automobiles use steel channels including walls, poles, roofs, window & door frames, beam support, vehicle frames and large trailer bodies.

- **TMT Bars**

TMT bars or Thermo-Mechanically Treated bars are high-strength reinforcement bars having a tough outer core and a soft inner core. We are a registered distributor of “Jindal Panther TMT” and exclusively deal in Panther TMT bars distribution. The product boasts of uniform and parallel rib pattern, low levels of carbon, earthquake resistant properties and greater resistance to fire among other features.

TMT bars are one of the most important construction materials that are widely used for building homes, multi-storeyed high rise, bridges, flyovers and other civil engineering structures. This is because TMT bars ensure high strength to the structures and improve their longevity. TMT bars can effectively withstand any kind of stress and load, thus, securing the structure from any further damages.

FLAT STEEL PRODUCTS

- **Plates / Sheets**

Steel sheets & plates are formed by an industrial process into thin, flat pieces which can be then cut and / or bent into a variety of shapes. We trade plain sheets and chequered sheets of varied sizes and thickness. We cater to our customers by providing them sheets cut into different sizes as per their requirement and the cutting is done by our workers at our godown. This way, we keep a track of remaining cut pieces and make sure that there is least possible wastage after the cutting.

Steel sheets & plates have a wide range of application from industrial use to uses in our day-to-day lives. Industrial uses include construction and infrastructure development where plates are used for various temporary and permanent structures, automobile industry, pressure vessels, marine and offshore equipment, military applications, white goods manufacturing and various other engineering and heavy machinery industries. Sheets & plates are also used for daily use items like tables, platforms, sign boards, utensils, etc.

- **Coils**

Steel Coils basically are flat products wound into rolls and having a rectangular cross-section, the width of which is much larger than the thickness. Hot-rolled sheet in coil form is produced from semi-finished products (slabs or billets), which are reduced to certain thicknesses by rolling and annealing and wound into a roll. Cold-rolled sheet in coil form is produced by removing rust from hot-rolled sheet by various processes and then winding it into a roll. Our Company trades hot rolled coils as well as cold rolled coils to various customers as per their size requirements. The cutting

process for the coils is outsourced by us and also such coils are sold directly after the cutting process. Thus, the coils are generally never stored in our godown.

Coils, which are known for being extremely ductile, have varied application in industrial as well as non-industrial products. Hot rolled coils have direct industrial and manufacturing applications in pipes, tanks, railway cars, bicycle frames, ships, engineering and military equipment, automobile frames and body parts, etc. Cold rolled coils are ideal for projects where precision is essential including various home appliances, metal furniture, precision tubes, containers, automobile body panels, etc.

BUSINESS PROCESS

Enquiry

Our Company receives enquiry for a particular product forming part of our portfolio from a prospective customer or through an existing customer. The enquiry generally includes the quantity, size and other details required by the customer. Many of these enquiries are specific in nature considering we trade in branded steel products and the quality, dimensions and other details of such branded products are available on the manufacturer website.

Stock at Godown / Purchase of Traded Goods

Our Company procures various steel products from different manufacturers in bulk quantity, which is stored at our godown. Due to this, we are able to provide with our customers quick confirmation and prompt delivery of the products required by them. We use cranes to load the products onto the delivery trucks. An e-way bill is generated by us for the quantity of products and the filled truck is again exited through the weigh bridge. The difference in weight is noted as the final quantity sold. The final quantity is re-verified and recorded as sale by our Company.

Payment

Upon receipt of the products / confirmation of the dispatch, the customer issues the final payment over a pre-decided period of time depending on the credit period extended to such customer.

MARKETING AND MARKETING SET-UP

The efficiency of the marketing and sales network is critical success of our Company. Our success lies in the strength of our relationship with our customers who have been associated with our Company. Our Company also endeavours to provide high quality branded steel products to our customers on a timely basis by obtaining distributorship of major steel manufacturing companies in India. Being a registered distributor also boosts our ability to attract new customers, as the big manufacturing companies do not ideally deal with small scale buyers. The Steel product market is based on technical specifications mainly in the construction, infrastructure and engineering industry. Our marketing team in consultation with the top management and the technical team ensure that detailed specifications are provided to the potential customers which enable them to make the correct choice. Further, the marketing team also ensures that each specification and variety is available in the least possible time by proper co-ordination with the purchase department.

Besides, the manufacturers where we are associated, we also strive to maintain cordial relations with a large number of medium and small manufacturers, from who we procure similar steel products for customers looking for economical options.

Steel products, structural and flat steel, is an industry driven majorly by precise technical needs as each product manufactured or construction carried out required a particular size, load and dimension engineered for the exact outcome. Our procurement team, under the supervision of our Whole Time Directors, Mr. Sanjay Bansal and Mr. Krishna Mehta, undertakes detailed study on the customers' requirement and also current manufacturing and construction standards and matches the same with the historical demands of our customers. Our procurement team also regularly takes feedback from the marketing team to understand the buying pattern of the customers and thus formulate a procurement strategy.

Further, the procurement team is also responsible for maintaining a proper procurement timeline, such that there is never shortfall in the various steel products when demanded by our customer. Many of our competitors have substantially large capital base and resources than we do and may offer broader range of products. We believe that the principal factors affecting competition in our business include client relationships, reputation, market focus and the relative quality, price of the products and any ancillary service provided. We believe that we are able to distinguish ourselves from our competitors on the basis of our strong Pan India presence, our registered distributorship / MoUs with various steel manufacturers, our customer network and reputation and the availability & timeliness of specific product deliveries.

We also compete to acquire distributorship rights for major steel manufacturers, each of whom have expertise across different steel product verticals. However, we believe that our wide network Pan India and our established marketing set-up provides us with a competitive advantage when competing for such distributorships, as we believe that the steel manufacturers recognise the market reach and premium distribution that may be obtained by partnering with us.

We compete with various organised and unorganised players across the country and also with various regional traders and distributors. We compete against our competitors by establishing ourselves as a knowledge-based trading company

with cordial relations with various suppliers, which enables us to provide our customers with the specified quantities at reasonable rates to meet their requirements.

D. REGULATIONS REGARDING FOREIGN INVESTMENT

Foreign Exchange Management Act, 1999

Foreign investment in companies in the manufacturing sector is governed by the provisions of the Foreign Exchange Management Act, 1999 (“FEMA”) read with the applicable regulations. The Department of Industrial Policy and Promotion (“DIPP”), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment (“FDI Policy”), with effect from August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Wholesale trading would, accordingly, imply sales for the purpose of trade, business and profession, as opposed to sales for the purpose of personal consumption. The yardstick to determine whether the sale is wholesale or not would be the type of customers to whom the sale is made and not the size and volume of sales. Wholesale trading would include resale, processing and thereafter sale, bulk imports with ex-port/ex bonded warehouse business sales and B2B e-Commerce. Further, Cash & Carry Wholesale Trading/Wholesale Trading (“WT”) is subject to the following conditions:

- a. For undertaking WT, requisite licenses/registration/ permits, as specified under the relevant Acts/Regulations/Rules/Orders of the State Government/Government Body/Government Authority/Local Self Government Body under that State Government should be obtained.
- b. Except in case of sales to Government, sales made by the wholesaler would be considered as ‘cash & carry wholesale trading/wholesale trading’ with valid business customers, only when WT are made to the following entities:
 - i. Entities holding sales tax/ VAT registration/service tax/excise duty registration; or
 - ii. Entities holding trade licenses i.e. a license/registration certificate/membership certificate/registration under Shops and Establishment Act, issued by a Government Authority/Government Body/Local Self-Government Authority,

reflecting that the entity/person holding the license/ registration certificate/ membership certificate, as the case may be, is itself/ himself/herself engaged in a business involving commercial activity; or Entities holding permits/license etc. for undertaking retail trade (like the bazari and similar license for hawkers) from Government Authorities/Local Self Government Bodies; or

iii. Institutions having certificate of incorporation or registration as a society or registration as public trust for their self-consumption.

An entity, to whom WT is made, may fulfill any one of the 4 (four) conditions stated above.

c. Full records indicating all the details of such sales like name of entity, kind of entity, registration/license/permit etc. number, amount of sale etc. should be maintained on a day to day basis.

d. WT of goods would be permitted among companies of the same group. However, such WT to group companies taken together should not exceed 25% of the total turnover of the wholesale venture.

e. WT can be undertaken as per normal business practice, including extending credit facilities subject to applicable regulations.

f. A wholesale/cash & carry trader can undertake retail trading, subject to the conditions applicable. An entity undertaking wholesale/cash and carry as well as retail business will be mandated to maintain separate books of accounts for these two arms of the business and duly audited by the statutory auditors. Conditions of the FDI Policy for wholesale/cash and carry business and for retail business have to be separately complied with by the respective business arms.

Our Company's business is a broad based distribution model, based on multiple steel products. The focus is to establish ourselves and capture a considerable market share in each of the steel product categories like beams, plates, angles, bars, etc. This helps to spread our market risks arising out of fluctuation in the market shares of various steel products and brands besides helping us to achieve economies of scale.

We mainly play a connecting role and support the manufacturers' demand generation activities through trade marketing. Our Company's operating model represents the indirect sales model and we play the role of supply chain consolidator between several steel manufacturers and the end users of the steel products. The key deliverables here are logistics, inventory management, credit and delivery at cost effective prices to the customers. Thus our business require stocking of various steel products at our dedicated godown and is working capital intensive.

Our product range of steel traded by us consists of both flat and long products. Following is the classification of product offerings of our Company:

For further details refer section titled "Product Portfolio – Our Business" on page no. 86 of this Draft Prospectus.

At present, we cater only to domestic markets and over the years we have build a strong and reliable customer base. We supply all kinds of steel products on a PAN India basis and our customers range from small steel processing units to large EPC companies and Real Estate & Infrastructure Developers. Some of our customers include Maharashtra Seamless, Kone Cranes, Dogus Soma JV, L&T STEC JV and IPCA to name a few. We have established cordial relations with dealers, traders and distributors who are well established in steel industry which help us gain long term benefits. We aim to expand our customer base by reaching out to new states and increasing the sales in existing states.

COMPETITION

The steel trading industry in India, while fragmented and unorganised, is highly competitive. Competition is faced by our business from other existing traders and manufacturers of steel products dealt by us. We engage with our competitors on a regional or product line basis. Many of our competitors have substantially large capital base and resources than we do and may offer broader range of products. We believe that the principal factors affecting competition in our business include client relationships, reputation, market focus and the relative quality, price of the products and any ancillary service provided. We believe that we are able to distinguish ourselves from our competitors on the basis of our strong Pan India presence, our registered distributorship / MoUs with various steel manufacturers, our customer network and reputation and the availability & timeliness of specific product deliveries.

We also compete to acquire distributorship rights for major steel manufacturers, each of whom have expertise across different steel product verticals. However, we believe that our wide network Pan India and our established marketing set-up provides us with a competitive advantage when competing for such distributorships, as we believe that the steel manufacturers recognise the market reach and premium distribution that may be obtained by partnering with us.

We compete with various organised and unorganised players across the country and also with various regional traders and distributors. We compete against our competitors by establishing ourselves as a knowledge-based trading company with cordial relations with various suppliers, which enables us to provide our customers with the specified quantities at reasonable rates to meet their requirements.

Significant Developments after March 31, 2019 that may affect our Future Results of Operations

The Directors confirm that no events or circumstances have taken place since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or are likely to affect the profitability of our Company, or the value of our assets, or our ability to pay liabilities within next twelve months.

FACTORS AFFECTING OUR RESULT OF OPERATION

Our business is subject to various risks and uncertainties, including those discussed in the section titled “*Risk Factors*” on page no. 14 of this Draft Prospectus.

Among various other factors that affect our financial results and operations for a given financial year, some key factors are as follows:

Revenue Generation

We earn our revenue from trading and distribution of various steel products, offering a wide variety of products of different key players in Indian Steel Industry. Our team through their experience and good rapport with customers, owing to timely and quality delivery of service, plays an instrumental role in creating and expanding a work platform for our Company. We provide an extensive range of products ranging from Beams, Channels, Angles, TMT Bars, Steel Plates & Sheets to Steel Coil, etc.

Our Company has partnered with a various renowned brands of varied products throughout the Country and we play the role of supply chain consolidator between several major steel manufacturers and various users in different industry like engineering, infrastructure, construction, automobiles, etc. Our Company also endeavours to provide high quality branded steel products to our customers on a timely basis by obtaining distributorship/MOUs with major steel manufacturing companies in India. We aim at increasing in operational output through continuous process improvement, better brand associations and better customer service and consistent quality development.

Our Financial Indebtedness and Financial Expenses

As of March 31, 2019 and March 31, 2018, we have ₹ 7,686.74 lakhs and ₹ 6,313.93 lakhs respectively, of outstanding debt including current maturities of Long Term Debt on our balance sheet. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and

- increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected. Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings. Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition.

Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

Our ability to successfully implement its strategy and its growth and expansion plans

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new distribution agreement, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures and may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and have an adverse effect on our business. Our strategy to augment our profit margins may not materialise in the manner we intend to, resulting in lower margins. Continued lower margins may affect our future growth and financial performance.

Further, if the estimates or assumptions used in developing our strategic plan vary significantly from actual conditions, our sales, margins and profitability could be impacted. For instance, sales of certain steel products may not grow as quickly as we currently expect, and we may be incorrect in our assumptions and expectations of industry preferences during our purchasing or entering / renewing into agreements with new / existing steel manufacturers. Also, the fund requirement and deployment for our strategies are based purely on management estimates and assumptions considering the current market scenario and are subject to revision in the light of changes in external circumstances or costs. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

Market Conditions and Terms of our Distribution Agreements

We are a multi steel products distribution and marketing Company and we enter into various distribution agreements / MOUs with top steel manufacturers in India. Accordingly, we are bound by the terms of the agreement in relation to supply of their products, selling targets and inventory management.

Above referred steel manufacturers are very particular about their terms and generally specify the terms in their agreements. These terms are based on the vendors' / manufacturers' perception and may or may not be viable in the market. This may lead to lower sales of that particular product eventually resulting in higher inventory and dead stock. Also, the terms of the agreement specify other parameters of trade like quantity, delivery terms, payment terms, all of which could affect our business process and in turn render us unable to dictate terms with our customers.

Furthermore, many of our vendors may not be proactive in renewing their agreements. Majority of our agreements are for a period of 1 year. There can be no assurance that there will not be a significant disruption in the supply of the particular product from such sources or, in the event of a disruption, that we would be able to locate alternative suppliers of such product on terms acceptable to us, or at all. Identifying and negotiating with a new steel manufacturer involves a process that requires us to become satisfied with their market demand, quality control, responsiveness and service. Non-availability or disruption in supply of any product may result in reducing our revenues by a considerable amount.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued the Consolidated FDI Policy Circular of 2017 ("FDI Policy") with effect from August 28 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.
